

# PROGRAM

Monday, 22 November 2021 | ONLINE | language 

## GREEN TRANSITION - Towards a Sustainable Industrial System

Transitioning to a climate-neutral and circular economy is important to transform the European industry, to become more competitive and innovative.

14:00 Alternative energies, resources optimization, recycling – How to integrate sustainability as a driver for innovative production

14:20 How to rethink the organization and finance sustainable transition

14:40 Sustainable and responsible environmental footprint strategy

15:00 Transition to a plastic circular economy

## DIGITAL TRANSITION – New Industrial Strategy

Digital Transition, which can be seen as an enabling process consistent with the aim to develop human-centric, resilient and sustainable industrial ecosystems, is a key pillar of the new industrial strategy and the twin transition of Europe.

16:00 Digital technologies as an Industry driver

16:20 Robotics

16:40 5G Network

17:00 Artificial Intelligence
